Aims-

To equip the participants with the knowledge, evidence and basic skills required to manage caries in children.

Objectives-

By the end of the course participants will-

- 1) To discuss the need for restoring primary teeth.
- 2) To select the most appropriate method for restoring carious primary teeth.
- 3) To discuss the application of pulp therapy techniques in the light of the new evidence.
- 4) To understand the principles in assessing and managing the carious/compromised first permanent molar in children.

Learning outcomes-

To be able to more confidently treat carious teeth in the younger patients
