10.00	Session 1- Periodontal Assessment
11.15	Coffee.
11.30	Session 2- Periodontal Classification & Diagnosis
13.00	Lunch.
14.00	Session 3- Periodontal Treatment Planning with Case Studies
16.30	Questions and feedback (RA &AA)
17.00	Close.

Course Aims.

This course will include problem solving to assess current treatment planning methods for periodontitis and peri-implantitis and enable the dental team to improve periodontal treatment planning in general dental practice.

Course Objectives.

After the course participants will be able to-

- 1- Identify and diagnose periodontal disease around teeth and implants.
- 2- Use appropriate methods of diagnosis and assessment.

- 3- Formulate treatment plans with the aid of case studies.
- 4- Be able to liaise with other members of the team including referral to provide sound care and management.

Learning outcomes.

Help you be able to diagnose and treatment plan for periodontal patients in general dental practice.
