**Aims:** To show how to provide optimum treatment and to give an opportunity to discuss problems and solutions related to clinical complete and partial denture prosthetics

**Objectives:** At the end of the course participants will understand:

- Good practice in the assessment and treatment of edentulous patients
- The use of special techniques used to manage difficult patients
- What is needed to achieve success when treating partial denture patients
- How to solve problems associated with partial dentures

**Outcomes:** Increased confidence in the provision of optimum complete and partial dentures for your patients
