

'Practical Planning for Periodontitis & Peri-implantitis'

Date and venue:

Monday 8th May 2017
Kenniford Farm, Clyst St Mary, EX5 1AQ
North and East Devon

Course Organiser:

David Lee and Samantha Braddock

Course Lecturers:

Paul Renton-Harper, Specialist in Periodontics
Alison Grant, Tutor Dental Hygienist

Programme

09.30	Registration
10.00	Periodontal Assessment
11.15	Coffee
11.30	Periodontal Classification & Diagnosis
13.00	Lunch
14.00	Periodontal Treatment Planning with Case Studies
16.30	Questions and Evaluation
17.00	Finish

Aim:

This course will include problem solving to assess current treatment planning methods for periodontitis and peri-implantitis and enable the dental team to improve periodontal treatment planning in general dental practice.

Objectives:

By the end of the session the participants will be able to:

1. Identify and diagnose periodontal disease around teeth and implants.
2. Use appropriate methods of diagnosis and assessment
3. Formulate treatment plans with the aid of case studies
4. Be able to liaise with other members of the team including referral to provide sound care and management.

Learning outcome:

1. Practitioners will be able to identify, diagnose and effectively manage patients with periodontal and peri-implant disease
2. Practitioners will have more knowledge for appropriate referral and liaison with other team members
