College London Dental Institute**

Programme

09.00 Registration & Tea/Coffee

09.15 Seminar – Aesthetic and functional restoration of posterior teeth: materials, anatomical form, occlusion, matrices and techniques for quick success. BJM

10.45 Tea/Coffee

11.00 Hands-On. Posterior Diagnostic Wax up exercise. WDS

13.00 Lunch

14.00 Posterior Aesthetics with direct composite. Bulk fill and natural layering. Rapid finishing techniques and the occlusal stamp. BJM

15.15 Tea/Coffee

15.30 Hands-On. Posterior composite shaping and finishing BJM

16.45 Discussion and Close

Aim: to provide the options and techniques for carrying out posterior diagnostic waxing and aesthetic posterior direct composite restorations and alternative indirect restorations

Objectives: By the end of the day delegates should have a better appreciation of:

- tooth shape in relation to posterior tooth anatomy
- posterior tooth aesthetics using composite layering techniques
- posterior occlusion
- bulk fill and natural layering techniques
- matrix systems and finishing techniques

Outcome: A better understanding of the options and techniques available regarding tooth shape and anatomy in relation to smile design and successful restoration outcomes and aesthetic composite layering.
