

Perfect Preps

Date and venue
Friday 9th March 2018
Gipsy Hill Hotel, Exeter

Course Organiser:
Samantha Braddock

Course Lecturer:
Prof Brian Millar BDS FDSRCS PhD FHEA Director of MClintDent Fixed & Removable
Prosthodontics, KCL; NHS Restorative Consultant KCH.

Programme

09.15	Registration
09.30	Introduction
09.40	Seminar on indirect restorations: options, preparation design, techniques. Focus is on indirect aesthetic veneers and crowns, including managing the occlusion.
10.15	Coffee
10.45	Designing aesthetic and functional restorations, testing designs with the patient, tooth preparation techniques, looking at models of tooth preparations
13.00	Lunch
14.00	Temporisation, provisional restorations
15.00	Tea
15.15	Impressions and cementation procedures. Checking the final occlusion.
16.15	Close

Aim: The aim of this course is to cover elements of planning, designs, preparations and cementation required to produce successful indirect restorations.

Objectives: By the end of this course delegates should be able to;-

1. understand when to use an indirect restoration.
2. select a suitable material and technique.
3. be aware of the important features of preparation design
4. know how to manage the occlusion
5. be able to carry out accurate tooth preparation
6. know how to use immediate dentine sealing when appropriate
7. understand how to take the good impressions, shade, jaw registrations and facebow records where necessary.
8. be able to correctly cement and check the final restoration.

Learning outcomes:

By the end of this course delegates will be able to:

- Plan when an indirect restoration is appropriate
- Select the suitable material and technique
- Improve their preparation including design and occlusion elements
- Cement and check final restorations appropriately
