Dunn**

Programme

09.00 – 09.30 09.30 -11.00	Registration and Tea/Coffee Welcome and introduction Which canals should we tackle and which should we refer? Access cavities
11.00 – 11.30 11.30 -13.00	Tea/Coffee Instruments and medicaments Reasons for failure
13.00	Finish

Aim: To ensure that practitioners feel confident in attempting basic Endodontic procedures in practice

Objectives: Following the course, participants will:

1. Be able to identify which root canal treatments can be tackled in general practice, and what is reasonable to refer
2. Understand the principles of preparing access cavities in anterior and posterior teeth
3. Understand the principles of instrumentation and the range of available files
4. Be aware of commonly used medicaments
5. Understand the reasons for endodontic failure

Outcome: To ensure that GDPs have the opportunity to refresh basic endo skills necessary to provide Tier 1 treatments in practice
