COURSE AIM:

To review the principles of MOS and provide hands on practical training in flap design bone removal, sectioning, and use of elevators and suturing.

COURSE OBJECTIVES:

1. To review the principles and techniques of MOS for the GDP.
2. To practice suturing on surgical models.
3. To practice raising flaps, bone removal, teeth sectioning, elevating and luxating on surgical models.
4. To review and discuss the management of the complication of MOS in dental practice.

Learning Outcomes:

1. Students will be able to describe and discuss the principles and techniques of MOS.
2. Students will be able to demonstrate on surgical models, raising a flap, sectioning and removing bone, elevating roots and suturing.
3. Students will be able to describe and discuss the management of post- operative MOS complications in primary care.
