### **Programme**

13.45-14.00	Tea and Registration.
14.00-16.45	Session 1.
16.45-17.00	Questions and feedback.

### **AIMS-**

The aim of the course is to develop the learners ability to recognise, asses and manage medical emergencies- adult and paediatric- in the primary dental setting..

### **OUTCOMES-**

- 1-** To provide training in how to perform an urgent care assessment of an ill patient.
- 2-** To outline processes and procedures to recognise, manage and where required provide basic and intermediate life support for medical emergencies.
- 3-** To outline the emergency drugs and equipment that should be held by dental surgeries.
- 4-** To explain the team approach to medical emergencies.

### **Learning outcomes-**

- 1-** Identify severe medical events which require urgent hospital admission.
- 2-** Recognise, manage and provide basic and intermediate life support for medical emergencies in line with the UK Resuscitation Council Guidelines.
- 3-** Identify, prescribe and administer- where appropriate – emergency drugs correctly.

- 4- Facilitate a team approach to medical emergencies so as to deal promptly with uncommon but potentially tragic events.
