Cara Ball BDS (Hons) MSc

Specialist in Special Care Dentistry

.

Programme

09.15	Registration
09.30	Caries in children and its prevention
11.00	Coffee
11.15	Early intervention and treatment of carious deciduous teeth
13.00	Lunch
14:00	Traumatic injuries to anterior teeth
15.15	Tea
15:30	Traumatic injuries to anterior teeth (continued)
16.30	Close

Aim:

To provide an overview of the prevention, early intervention and treatment of dental caries in children and the management of children with traumatised front teeth

Objectives:

By the end of the day delegates should have a better understanding of:-

Caries and its prevention

Early intervention and treatment of carious deciduous teeth

The diagnosis of traumatic injuries to anterior teeth

The management of traumatic injuries to anterior teeth

The implications of caries and trauma with regard to safeguarding

Outcomes:

By the end of the day delegates will:-

Have a more detailed knowledge of the current evidence regarding prevention, early intervention and treatment of dental caries in children.

Have knowledge on management of children with traumatised front teeth.

Delegates will have greater confidence in managing children in primary care dentistry.

GDC development Outcome: C
