

## Endodontics Simplified (SW18 12-03-1)

Monday 3<sup>rd</sup> December 2018  
Engineers House, Clifton, Bristol  
BS8 3NB

Course Organiser  
Diane Bell

Course lecturer  
Dr Jonathan Cowie BDS Dip endo MClintDent (Endo) MEndo RSC (Ed)  
&  
Dr Luca Moranzoni BDS, MFDS, RCSEd MClintDent MEndo RSCEd  
**Programme**

9.00 – 9.30 Registration & Refreshments

9.30 -10.30 Diagnosis & Treatment Planning

10.30-11.45 Rubber Dan Hands on

11.45 – 12.45 Glide Path Management & Contemporary Canal Preparation using OneG and OneCurve Files.

12.45- 13.45 Lunch

13.45 – 14.15 Irrigation/Obturation

14.15-15.30 Use of Bulk-Fill Composite for Simplified Core Fillings

15.30 – 16.15 Theory and hands on practical using Custom CAD 3D printed Typodont

16.15-16.30 Questions/Evaluations

16.30 Course Close

**Aims** This interactive course will enable an evidence-based approach to the predictable management of the non-vital tooth, from diagnosis and beyond

**Objectives** At the end of the course, participants will have:

1. An understanding of the diagnosis process and assessment and surrounding decisions for endodontic treatment.
2. Gain proficiency, understanding and hands -on experience of de novo root canal treatment.

## Dental Postgraduate Department

Health Education South West

3. Gain hands-on experience with OneG and OneCurve for simplified and efficient canal preparation
4. Gain hands-on experience with a simplified cold lateral obturation technique and bulk-fill core filling restoration

**Learning Outcomes** Tackle endodontic cases in practice with a systematic approach  
Have protocols for rubber dam isolation in practice  
Instruct and obturate canals with a simplified approach

**GDC development outcomes A,C,D**

.
