- 15.00-15.30 Tea
- 15.30-16.00 Questions and practice

**Aim**

To develop the surgical extraction skills of GDPs

**Objectives**

1. Recall the principles for surgical dental extractions and apply them to clinical cases

## **Dental Postgraduate Department**

2. Identify current instruments and equipment used for surgical dental extractions

Using pigs heads:

3. Practice designing and raising mucoperiosteal flaps
4. Remove bone, section and elevate teeth
5. Practice suture techniques and wound closure

### **Outcomes**

To encourage dentists to provide surgical extractions in practice
