Aim

This course aims to ensure practitioners are up to date with current best practice in managing periodontal disease.

Dental Postgraduate Department

Objectives

Following the course, participants will:

1. Understand the classification of periodontal disease
2. Understand the rationale for surgical and non surgical periodontal therapy
3. Appreciate the importance of supportive therapy
4. Have an understanding of peri-implantitis and treatment options
5. Understand how periodontal disease including its sequelae can be managed within a practice setting

Outcomes

To be able to better diagnose and treat periodontally compromised patients in general dental practice
