Dental Postgraduate Department

Aim

To understand and be able to use a logical approach to design aesthetic restorations and avoid errors,

Objectives:

To provide education on smile analysis and trial techniques

To teach dentists how to manage tooth aesthetics using contemporary materials to restore aesthetics and function.

To discuss techniques to obtain optimised tooth preparations to balance MI with best outcomes

To be able to record accurate impressions then make and use provisional restorations

Learning objectives

By the end of this course, participants should;

- 1 be able to assess a smile and design changes
- 2 understand the options to show patients the design options beforehand
- 3 be able to prepare teeth, take accurate impressions and provide provisional restorations
