15.30 - 16.15	Session 3: Alternative bridge options.
16:15 – 16:30	Questions, evaluations and course close.

**Course Aim**

To ensure general dental practitioners consider, where appropriate, resin bonded bridges as a treatment option for the management of missing teeth.

**Dental Postgraduate Department****Course Objectives**

Following the course, participants will:

- Be able to identify cases where resin bonded bridges could be used successfully
- Appreciate why resin bonded bridges may be a better option than alternative restorative solutions
- Understand to reasons for resin bonded bridge failure (and success!)
- Describe the features of good resin bonded bridge design
- Know how to place and adjust resin bonded bridges in practice

**Learning Outcomes**

Following the course, participants will be in a better position to place resin bonded bridges in practice.
