

Dental Postgraduate Department

Preformed metal crowns: theory and practical guide

SW-19-04-23-01

Date and venue:

Tuesday 23rd April 2019
Gipsy Hill Hotel, Exeter

Course Organiser:

Samantha Braddock

Course Lecturers:

Daniel Knibb
Vicky Foster

Programme

18.00	Registration and light buffet supper
18.30	Presentation: The scientific basis for use of preformed metal crowns
19.15	Questions
19.25	Break
19.40	Practical session
20.10	Troubleshooting and questions
20.30	Close

Aim: To improve participants' understanding of preformed metal crowns in general dental practice: the scientific basis and necessary practical skills.

Objectives: by the end of the course, participants will;

1. Understand the scientific basis for the use of preformed metal crowns (PFMs) in dental practice
2. Understand the indications for PFMs
3. Have the practical skills to be able to place PFMs
4. Understand options for managing more challenging cases

Learning outcomes:

1. Understand which patients would benefit from PFMs
2. Be able to explain the benefits and disadvantages of PFMs to patients/parents
3. Be able to place PFMs routinely in general practice
4. Improve ability to manage patients with more challenging needs
