

Dental Postgraduate Department

Hands on Workshop on Improving Mechanical Debridement Technique for Better Clinical Outcomes.

(SW19-03-07-2)

Date and venue:

Thursday 7th March 2019

China Fleet Country Club
Saltash
Cornwall
PL12 6LJ

Course Organiser:

Heidi Mills

Course Lecturers:

Dr Peter Galgut Ph.D., M.Phil., M.Sc., BDS, MRD.RCS, LDS RCS,

Programme

09:00 – 09:30	Registration & Refreshments
09:30 – 10:45	Session 1 Lecture: What's new in periodontics instrumentation
10:45 - 11:00	Coffee Break
11:00 – 12:30 continued...	Session 2: What's new in periodontics instrumentation
12:30 – 13:30	Lunch buffet provided by China Fleet
13:30 - 14.45	Session 3 Practical: Workshop & open seminar
14:45 – 15:00	Coffee Break
15:00 - 16.15	Session 4: Hands on workshop continued...
16:15 – 16:30	Questions/Evaluations and course close at 16:30.

Dental Postgraduate Department

Aims

To summarise the current thinking in root surface debridement techniques. The course will demonstrate and give practical advice on effective root surface debridement in clinical practice. The course aims to enhance effective clinical management of periodontal related problems.

Objectives

1. Participants to gain confidence through updating and improving their mechanical debridement techniques.
2. Participants will be able to manage the periodontal problems of their patients more efficiently and effectively.
3. Participants will be introduced to new design in instrumentation to improve their clinical efficacy.
4. Participants will have the tools to achieve improved and more efficient management of periodontal diseases.

Learning Development Outcomes:

A, B and C
