Aim

To revise the principles of oral surgery and increase confidence in approaching minor oral surgery in practice.

Dental Postgraduate DepartmentObjectives:

Following the course delegates will;

- Know how to assess a patient for minor oral surgery
- Identify those patients who should be referred
- Understand the principle of raising a flap
- Be able to suture effectively
- Recognise and deal with common complications

Learning objectives:

Following the course, dentists will be more confident in providing minor oral surgery for their patients.

GDC development outcome:

C

The eGDC activity log suggests reflecting on the following during and after this course:

- What did you learn (or confirm) from the activity that was helpful or relevant to your daily work and patients?
- Did you identify any changes/updates needed in your daily work, and if so, what? How did you make these changes?
- If you didn't identify changes needed, what did the activity confirm for you, that you may already know or be doing?
- What was the benefit to your work and/or your patients in carrying out this activity?
