AIMS:

- 1- To equip the participants with the knowledge, evidence and basic skills required to manage caries in children.
- 2- An update of the 'Dental Check by 1' pilots operating in the South West.

OUTCOMES:

- 1- To discuss the need for restoring primary teeth.
- 2- To select the most appropriate method for restoring carious primary teeth.
- 3- To discuss the application of pulp therapy techniques in the light of the new evidence.
- 4- To understand the principles in assessing and managing the carious/compromised first permanent molar in children.
- 5- To understand the aims and objectives of the 'Dental Check by 1' initiative.

LEARNING OUTCOMES:

To be able to more confidently treat carious teeth in the younger patient.
