

Dental Postgraduate Department

**Surgical Extraction Skills for GDPs
(SW19-10-08-1)**

Date and venue:

**Tuesday 8th October 2019
Vesalius Clinical Training Unit
University of Bristol
Southwell Street
Bristol BS2 2EJ**

Course Organiser:

Lucy Silk

Course Lecturers:

Carla Fleming and Tim Harris

Programme

9.00 - 9.30 Registration

9.30 - 10.00 Talk and discussion - recall the principles of surgical dental extractions

10.00-11.00 Pigs Heads - Instrumentation and flap design

11.00-11.15 Refreshments

11.30-12.30 Pigs Heads - Bone removal and sectioning teeth

12.30-13.30 Lunch

13.30-14.30 Pigs Heads - Suturing

14.30-15.00 Pigs Heads - Oro-antral communications, fractured tuberosities

15.00-15.30 Tea

15.30-16.00 Questions and practice

Aim

To develop the surgical extraction skills of GDPs

Dental Postgraduate Department

Objectives

1. Recall the principles for surgical dental extractions and apply them to clinical cases
2. Identify current instruments and equipment used for surgical dental extractions

Using pigs heads:

3. Practice designing and raising mucoperiosteal flaps
4. Remove bone, section and elevate teeth
5. Practice suture techniques and wound closure

Outcomes

To encourage dentists to provide surgical extractions in practice
