

**Interpreting Intra-Oral and Extra-Oral RADIOGRAPHS.**

Date and venue:

4<sup>th</sup> August 2020

Zoom

Course Organiser:

Keith George.

Course Lecturer:

Linda Parrott BDS MSc MA Specialist Primary Dental Care

**Programme**

- |       |                                                                      |
|-------|----------------------------------------------------------------------|
| 16.30 | Introduction                                                         |
| 16.35 | Normal Radiographic anatomy.                                         |
|       | Diagnosis of Dental Pathology from Intra-Oral Radiographs with audit |
|       | Diagnosis of Dental Pathology from Extra-Oral Radiographs with audit |
| 18.20 | Questions and feedback.                                              |

**Aims.**

The course will enable participants to confidently report on the radiographs they take in practice.

**Objectives.**

- 1- Be familiar with normal radiographic anatomy seen on intra-oral radiographs and dental panoramic radiographs.
- 2- To be able to diagnose dental pathology on intra-oral and dental panoramic radiographs.
- 3- To have a working knowledge of the FGDP (UK) selection criteria for dental radiography.
- 4- To be able to carry out a relevant and successful audit of radiographs taken.

**Outcomes.**

The course links to GDC learning outcomes in patient care-

Foundations of practice 1.1.1/1.1.3/1.1.6

Comprehensive patient assessment 1.2.4

Diagnosis 1.4.2

Treatment planning 1.5.1
