12.30 -1.30	Lunch

Dental Postgraduate Department

1.30 -2.20	Re-evaluation following step 2 of care Periodontal treatment outcomes and next steps Monitoring and supportive periodontal therapy Referral
2.20 -2.30	Break
2.30 –3.20	Periodontal Surgery Implants
3.20 -3.30	Break
3.30 -4.20	Ideas for management of periodontal diseases in the primary care NHS setting Case Study

Aim

To update learners about contemporary periodontal practice and the management of periodontal disease.

Objectives:

1. To provide training in screening and assessment for periodontal diseases.
2. To explain contemporary non-surgical periodontal disease management.
3. To discuss periodontal treatment outcomes and interim care management programmes for patients.
4. To discuss treatment approaches and selection criteria for referral.
5. To outline a multidisciplinary approach to comprehensive person-centred care when managing patients with periodontal disease.

Outcomes:

Following this course learners should be able to:

1. Evaluate the periodontal tissues and accurately diagnose periodontal diseases.
2. Treatment plan periodontal care and provide non-surgical therapy.
3. Evaluate the results of periodontal treatment so as to establish and monitor suitable interim care management programmes for patients.
4. Act on the basis of complexity assessment so as to refer patients appropriately for specialist care.

Dental Postgraduate Department

5. Describe the role of Dental Care Professionals in periodontal therapy, and work with them in managing patients with periodontal disease.

GDC development outcome:

C

The eGDC activity log suggests reflecting on the following during and after this course:

- What did you learn (or confirm) from the activity that was helpful or relevant to your daily work and patients?
- Did you identify any changes/updates needed in your daily work, and if so, what? How did you make these changes?
- If you didn't identify changes needed, what did the activity confirm for you, that you may already know or be doing?
- What was the benefit to your work and/or your patients in carrying out this activity?
