

## **Professor Jeff Lewis Cardiff Metropolitan University**

Professor of Flexible Learning

As leader of the Dental Technology teaching team, he introduced an innovative delivery method that utilised videoconferencing to deliver programmes to geographically remote learners and this resulted in him being awarded a National Teaching Fellowship in 2014.

He has delivered continual professional development to dental care professionals since its introduction. He has and continues roles as validation panel member, programme design and external examiner for dental technology (and other subject) providers in UK and Europe. He is currently investigating the use of extended realities and immersive technologies and their role in education for healthcare.

Current responsibilities include

Programme Director BSc (Hons) Dental Technology,  
Director MSc Dental Technology (Distance Learning)  
Principal Lecturer for CPD and Distance Learning  
School lead for immersive and technology use in higher education
