15.00-15.30	Tea
15.30-16.15	Clinical cases – an oral physicians handbook, Part 2
16.15 -17.00	Interactive quiz and discussion
17.00	Close

Course Aims:

1. To provide an overview of the range of oral mucosal lesions that may be present in general dental practice
2. To provide an awareness of the clinical presentation of oral potentially malignant lesions and oral cancer

Dental Postgraduate Department

3. To provide an awareness of the diagnostic approach to oral mucosal lesions in specialist oral medicine practice

Objectives:

By the end of the course,

1. Participants will be able to recognise the mucosal lesions that require onward referral for specialist assessment
2. Participants will have increased awareness of the diagnostic pitfalls of oral mucosal disease presenting in general dental practice
