Aim:

To provide an overview of the range of oral mucosal lesions that may present in general dental practice;

To provide an awareness of the clinical presentation of oral potentially malignant lesions and oral cancer;

To provide an awareness of the diagnostic approach to oral mucosal lesions in specialist oral medicine practice.

Objectives: by the end of the course, participants will;

1.By the end of the course the participants will be able to recognise the mucosal lesions that require an onward referral for specialist assessment;

2.By the end of the course the participants will have increased awareness of the diagnostic pitfalls of oral mucosal disease presenting in general dental practice.

Outcomes: By the end of the day course participants should;

1. be able to demonstrate knowledge of the range of mucosal lesions that may present in general dental practice.

2. be able to demonstrate knowledge of the clinical presentation of oral potentially malignant lesions and oral cancer and when to refer these.

3. be aware of the diagnostic approach to mucosal lesions in specialist oral medicine practice.

4.be aware of the diagnostic pitfalls of oral mucosal disease presenting in general dental practice.
