18.45 Lecture: Post Retained Restorations, When, Why and How?  
20.30 Questions  
20.45 Close

**Aim**

To improve awareness of when and how to use post retained restorations

**Objectives:**

- Consider the importance of ferrule in post retained restorations
- To review different types of post and their relative advantages and disadvantages
- To consider how to improve the chance of restorative success in the compromised situation

**Learning objectives:**

Following this course, dentists will be more confident in placing posts, enabling them to tackle more complex restorations in practice.

**GDC development outcome:**

C

The eGDC activity log suggests reflecting on the following during and after this course:

- What did you learn (or confirm) from the activity that was helpful or relevant to your daily work and patients?

**Dental Postgraduate Department**

- Did you identify any changes/updates needed in your daily work, and if so, what? How did you make these changes?
- If you didn't identify changes needed, what did the activity confirm for you, that you may already know or be doing?
- What was the benefit to your work and/or your patients in carrying out this activity?
