Dental Postgraduate Department**Aim**

To review the principles of oral surgery and increase confidence in approaching Minor Oral Surgery in practice.

Objectives:

On completion of the course, participants will;

1. Know how to assess a patient for Minor Oral Surgery
2. Identify those patients who should be referred
3. Understand the principle of raising a flap
4. Be able to suture effectively
5. Recognise and deal with common complications

Learning objectives:

Following the course, dentists will be more confident in providing Minor Oral surgery for their patients.

GDC development outcome:**C**

The eGDC activity log suggests reflecting on the following during and after this course:

- What did you learn (or confirm) from the activity that was helpful or relevant to your daily work and patients?
- Did you identify any changes/updates needed in your daily work, and if so, what? How did you make these changes?
- If you didn't identify changes needed, what did the activity confirm for you, that you may already know or be doing?

Dental Postgraduate Department

- What was the benefit to your work and/or your patients in carrying out this activity?
