

# INFORMATION MASTERY

*And using it to help your trainees prepare for the AKT*

Monday, 14th May 2018 — Don Valley House, Sheffield

Time: 09:00

- Help registrars with AKT prep
- Increase your confidence in teaching EBM
- Cope better with Information Overload

By the end of the day, trainers will be more familiar with the AKT content, have a plan for supporting candidates' preparation, and feel more confident about helping candidates with what is for many the most challenging area in the AKT topics – evidence-based medicine. Trainers will also explore the concept of Information Mastery and consider how they can use this to facilitate the development of their trainees.

***Pre-Course Preparation Can Be Found Here:***
