

Quality improvement for WPBA

Facilitated by:

Amar Rughani (GP Sheffield) and Sarah Soar (GPST leadership fellow)

Background:

Currently, the MRCGP includes a requirement to undertake clinical audit. This will change in due course to become a quality improvement activity that tests both knowledge of improvement methodology and leadership skills.

Aims for the session

We will use a practical and interactive approach to familiarise practitioners with quality improvement methodology at a level that will be expected of future trainees

Objectives:

Understand how priorities for change can be identified.

Know the 'quality improvement cycle'

Clarify the drivers for change

Identify a change idea that can be implemented and measured

Understand the importance of PDSA cycles

Become familiar with a run chart

Identify how to sustain and spread to change
