

# **“When And How To Say No” In Medically Unexplained Symptoms**

**Friday, 12th October 2018 – Leadership Academy, Leeds**

**09:00 - 16:00**

## **Consultations With No Diagnosis**

**How comfortable are you with no diagnosis in the consultation?**

Most experienced GPs say the job is getting more complex so let's simplify some of the skills.

### **Aim**

To raise doctors confidence and skills in the appropriate challenge of patients with specific complex problems (on this occasion medically unexplained symptoms)

### **Objectives**

- To raise the group knowledge base on medically unexplained symptoms in General Practice.
- To raise the group knowledge base on specific confrontation related consultation skills
- To perform and raise the groups specific confrontation skills when consulting with patients who have medically unexplained symptoms
