

Yorkshire Complex Abdominal Wall Reconstruction Cadaver Course

5 and 6 September 2022

**York Teaching Hospital, Wigginton Road YO31 8HE &
Worsley Building, University of Leeds, LS2 9NL**

Course Director – Mr P Chitsabesan

Course Faculty –

Mr S Chintapatla, Colorectal Surgeon and AWR Specialist

Mr I Adam, Colorectal Surgeon and AWR Specialist

Mr Richard Young, UGI Surgeon and AWR Specialist

Mr Tom MacLeod

Mr Phil Lim, Plastics Surgeon and AWR Specialist

Professor P Bazira, Programme Director: MSc in Clinical Anatomy

Zoe Murphy, Perioperative nurse

Nishant Jankee, Operational manager

Visiting faculty

Mr Mark Cheetham, National Clinical Lead for General Surgery at

Getting it Right First Time – NHS England

The Shrewsbury and Telford Hospital NHS

Course co-ordinator - Ms Jo Johnson

This course involves a full day of theory and practical experience and knowledge of this complex are being shared via didactic teaching and group discussions and imaging.

The faculty is highly experienced and varied with both general surgeons and plastic surgeons involved to provide expert surgical mentorship. We are lucky to have an anatomist to present the detailed anatomy of the surgical environment.

The second day, takes place in the cadaveric labs in Leeds. We will have 6 Thiel cadavers available and a mixture of delegates. Trainees will consist of general surgical trainees of different levels. Paediatric surgical trainees have also been invited. There will also be theatre assistants and we have invited several surgical care practitioners.

Day 1- York- Lectures 5th sept

York Teaching Hospital, Wigginton Road O31 8HE

Classroom 1, Postgraduate department, 5th floor admin block

9.30	Abdominal wall anatomy	P Bazira
10.00	Abdominal wall hernia classification and what it means	P Lim
10:15	Why we must GIRFT	M Cheetham
10:35	York approach	S Chintapatla
11:05	Coffee break	
11.20	Radiological assessment	D Petty
11.40	Pre-optimisation and prehabilitation	Z Murphy
12:00	How to manage a service	N Jankee
12:15	Lunch	
12:50	Modified Rives-Stoppa	R Young
13:10	Anterior Component separation	P Chitsabesan
13:40	Posterior Component separation (TAR)	I Adam
14:10	Coffee break	
14.30	Plastic techniques	T MacLeod
15:00-17:00	York CAWR live clinic drop-in	S Chintapatla/P Lim
16:20	Complications	I Adam
16:40	Role Biological Mesh	R Young
17:00	Feedback and questions	Everyone

Day 2- Leeds Cadaveric dissection 6th sept

Worsley Building, University of Leeds, LS2 9NL

- Practical sessions
- Modified Rives-Stoppa

Coffee break

- Anterior component separation

1 x SILACS then 1 x open each

(Measure distance of midline sheath to ASIS and Kocher's angle, then skin)

- preserve perforators and nerves)

Lunch

- TAR – Posterior component separation
- Closure
- Summary

Assessment of course

We will obtain verbal feedback on a regular basis and use the standardised assessment forms for formative feedback on the course and its delivery over both days and also of the cadavers themselves.

This will be used to inform the course for 2019. We may expect that the cadavers will not score as highly as early on in the programme as this will be the last course performed on them.

Sponsorship

We will kindly receive sponsorship from **Ethicon** and **BD** for supplies for the cadaveric procedures.

Please visit their stands when able during breaks and they can discuss potentially new and exciting innovations
